(Women's Health and Aging Study, screening and baseline interviews, 1992-1995)

All variables have less than 2% missing data. Results are based on non-missing data.

Descriptive statistics are based on weighted data.

No ADL difficulty; disabled in two or more domains (see Chapter 1).

The question is in the form "By yourself, that is, without help from another person or special equipment, do you have any difficulty .

How much difficulty do you have?

The percents of participants reporting their levels of difficulty may not add up to the percent reporting difficulty due to (1) rounding (2) level of difficulty not reported.

The screener question is in the form "Because of a health or physical problem, do you have any difficulty . . . ?" The presence of the condition was confirmed in the baseline interview.

the condition was confirmed in the baseline interview.
